\* The first issue of Volume 69 contains abstracts of Fall 95 Meeting Papers. The papers are cited in the index as (abs-F95#..) with the appropriate paper number inserted. The fourth issue of Volume 69 has abstracts from the Spring 1996 meeting. They are cited using a similar convention, i.e., (abs-S96#..). (The Fall 96 meeting abstracts will appear in Issue 1, 1997.) Complete copies of meeting papers may be obtained from the Rubber Division Library, The University of Akron, Akron OH 44325-3907.

## SUBJECT INDEX\*

- 1,3,4-thiadiazole derivatives, for curing of CR (abs-S96#45) (4) 726
- Abrasion resistance, of tire treads, new black fillers for optimizing (abs-S96#4) (4) 714
- Abrasion, of rubber, effect of blade sharpness and temperature (5) 807
- Accelerators, based on mercapto pyridine, -pyrazine, and -pyrimidine (2) 180
- Adhesion, of brass-coated wire to NR, improving with precipitated silica (1) 048
- Adhesion, wire cord, antitack agents effect on (abs-F95#2) (1) 137
- Alkyl lithium initiators, functionalized, for synthesis of functionalized elastomers (rev) (3) 444
- Alpha-chain-end functionalization of initiators, and post-polymerization functionalization (rev) (3) 444
- p*-Aminobenzenesulfonyl azide, coupling agent for black-rubber to improve wet grip (2) 266
- Anionic polymerization, of functionalized elastomers (rev) (3) 444
- Antioxidants, phenolic, solubility in rubber and LDPE (5) 885
- Antireversion agent, for sulfur vulcanization of diene rubbers (5) 727
- Antitack agents, compatibility in processing (abs-F95#1) (1) 137
- Antitack agents, effect on down-stream processes (abs-F95#12) (1) 140
- Antitack agents, effect on compound properties and wire cord adhesion (abs-F95#2) (1) 137
- Antitack agents, interactive continuous improvement in (abs-F95#3) (1) 138
- Antitack agents, mechanical handling and applications (abs-F95#13) (1) 140
- Antitack coatings, costs of using (abs-F95#14) (1) 140
- Arruda-Boyce constitutive model, for rubber elasticity, compared with Gent model (5) 781
- Atomic force microscope (AFM), for determining fine scale variations in crosslink density (abs-S96#13) (4) 716
- Atomic force microscope, for measuring crosslink density of elastomers on a fine scale (5) 801
- Automobile scrap, recovering rubber and plastic parts (abs-F95#7) (1) 138
- Automotive polymers, recycling (abs-F95#16) (1) 140
- Batch inclusion bags, materials using metallocene catalyst technology (abs-S96#7) (4) 715
- Bearings, mass transfer during compression creep in (5) 752
- Bekkedahl, Norman, International Rubber Science Hall of Fame Inductee, 1996, biog. (2) G30
- BIMS [brominated poly(isobutylene-co-*p*-methylstyrene)], crosslink density in IR (abs-S96#11) (4) 715
- BIMS/IR blends, quantitative determination of filler distribution (abs-S96#12) (4) 716
- Biscitraconimides, as antireversion agents for sulfur vulcanization of diene rubbers (5) 727
- Blade, of abrasion tester, effect of sharpness on test results with various rubbers (5) 807
- Blends, of elastomers, dynamic properties (abs-F96#44) (4) 725
- Blends, of NR, SBR, BR, and EPDM, morphology development and miscibility (5) 769
- Blends, of SBR and BR, analysis by thermogravimetric methods (1) 130
- Block copolymerization characterization (rev) (3) 462
- Bloom, iridescent, in EPDM body seals, controlling through compounding (abs-S96#42) (4) 725
- Bonded rubber blocks, mass transfer during compression creep (5) 752

\* Prepared by Lois W. Brock.

- Brominated isobutylene-*p*-methylstyrene, blend with NR for engine mounts (abs-F96#44) (4) 725
- Bubble formation, in polymer melts and elastomers (rev) (3) 424
- Burrito, precision preweighed, predispersed cure package (abs-S96#20) (4) 718
- Cajun bag (abs-S96#10) (4) 715
- Calcium carbonate-filled EPDM, reducing shear viscosity and yield with increased particle (4) 628
- Carbon black aggregate, modeling methodology (1) 8
- Carbon black dispersion, influence on grip property of high performance tire tread (abs-S96#2) (4) 713
- Carbon black filled compounds, new laboratory tool for predicting traction of (5) 786
- Carbon black filled compounds, high frequency viscoelasticity of for predicting traction (abs-S96#6) (4) 714
- Carbon black, effect on viscosity of rubber compounds (abs-S96#32) (4) 721
- Carbon black, fluorinated, as filler for SBR, effect of curative level (2) 273
- Carbon black, furnace, structure determination (rev) (3) 569
- Carbon black, studying the electronic nature of (abs-S96#30) (4) 721
- Carbon black, use of structure and specific area for assessing compound properties (abs-S96#31) (4) 721
- Carbon black-filled rubber, strain dependence of dynamic mechanical properties (1) 15
- Carbon black-filled vulcanized, dynamic stress softening of (abs-S96#33) (4) 722
- Carbon black-loaded rubber melts, reinforcement mechanisms (2) 253
- Carbon black-rubber coupling agent, for improving rolling resistance in tires (2) 266
- Carbon-black filled elastomers, knotty tearing pattern over a wide temperature range (5) 834
- Catalyst, constrained geometry, for producing EPDM polymers (abs-S96#36) (4) 723
- Catalysts, constrained geometry, for making EPDM (abs-S96#37) (4) 723
- Catalysts, with constrained geometry, for making ethylene/alpha olefin/diene elastomers (abs-F95#8) (1) 139
- Catalysts, with constrained geometry, in preparation of EPDM materials (abs-F95#9) (1) 139
- CEBC, hydrogenated butadiene stereoisomeric block polymer (abs-S96#39) (4) 724
- Chain scission, during mixing of filled NR and SBR compounds (abs-S96#26) (4) 719
- Chain scission, during mixing of filled compounds of NR and SBR (5) 742
- Chlorobutyl rubber, electrostriction of (abs-F95#24) (1) 143
- Chlorosulfonated polyethylene, electrostriction of (abs-F95#24) (1) 143
- Compression testing, of porous rubber (2) 223
- Compression testing, of porous rubber (abs-F95#23) (1) 142
- Compression creep, of bonded rubber blocks, mass transfer in (5) 752
- Constant strain energy loss, for correlating wet tire traction and viscoelastic properties (abs-S96#5) (4) 714
- Conveyor belts, reactions on rubber-covered pulleys (abs-F95#25) (1) 143
- CR, curing with 1,3,4-thiadiazole derivatives (abs-S96#45) (4) 726
- CR, laboratory measure of viscoelastic properties during processing (abs-S96#27) (4) 720
- Criticality concept, in explaining tire wet traction (abs-S96#1) (4) 713
- Criticality concept, in testing for tire traction (5) 858
- Crosslink density, in devulcanization of SBR with ultrasound (1) 104
- Crosslink density, of blends of IR and brominated poly(isobutylene-co-*p*-methylstyrene) (abs-S96#11) (4) 715
- Crosslink structure, of NR and SBR vulcanizates with TOR processing aid, elucidation of (abs-S96#46) (4) 726
- Crosslinking mechanism, for diene rubbers using dicumyl peroxide (2) 203
- Crumb rubber, modification to enhance properties of recycled rubber (abs-F95#21) (1) 142
- Crystallization, of NR, low temperature, synergistic effect of mixed and esterified fatty (4) 608
- Crystallization, of *cis*-1,4-polyisoprene, synergistic effect of fatty acids on (4) 600
- Cut growth, of NR, *cis*-BR, and blends, during single and repeated extension (5) 807
- Devulcanization of sulfur vulcanized SBR, by ultrasonics (1) 104
- Devulcanized crumb, with enhanced properties (abs-F95#21) (1) 142
- Di- and tri-functional initiators, for isobutylene polymerization (rev) (3) 462
- Dicumyl peroxide, mechanism of crosslinking diene rubbers with (2) 203
- Diene rubbers, mechanism of crosslinking with dicumyl peroxide (2) 203
- Diffusion, of solvents in BR using gas chromatography (2) 234
- Dispersion quality, in batch compounding (1) 1
- Dispersion, of carbon black, influence of wettability of processing additive (abs-S96#2) (4) 713
- Dynamic mechanical properties, of black-filled rubber, strain dependence (1) 15
- Dynaron®, hydrogenated polymers, modifiers and compatibilizers for thermoplastic polymer (abs-S96#39) (4) 724
- Educational symposia, at Rubber Division Meetings (3) G41
- Elasticity, comparison of Gent model with that of Arruda-Boyce for predicting (5) 781
- Electron beam grafting and crosslinking, of EVA copolymer, characterizing structure (1) 120
- Electronic characterization, of carbon black (abs-S96#30) (4) 721
- Electrostriction coefficients, of rubber sheets, measuring (4) 674
- Electrostriction, of polychloroprene and other rubbers (abs-F95#24) (1) 143

- Engine mounts, of NR blended with brominated isobutylene-*p*-methylstyrene rubber (abs-F96#44) (4) 725
- EPDM profiles, reinforced with various phenol/formaldehyde resins (abs-S96#43) (4) 725
- EPDM scrap, from hose, for use in new batch of EPDM hose (abs-F95#19) (1) 141
- EPDM seals, compounding to control iridescent bloom (abs-S96#42) (4) 725
- EPDM, constrained geometry catalyst for making (abs-S96#36) (4) 723
- EPDM, continuous reclaiming process for (abs-F95#6) (1) 138
- EPDM, continuous reclaiming process for (abs-F95#7) (1) 138
- EPDM, granular gas phase polymerization, advantage in single-phase mixing (abs-F95#11) (1) 139
- EPDM, highly filled, rheological behavior of (4) 628
- EPDM, made using constrained geometry catalysts (abs-S96#37) (4) 723
- EPDM, made with constrained geometry catalysts (abs-F95#9) (1) 139
- EPDM, reactive and eutectic behavior of accelerators in curing (abs-S96#20) (4) 718
- EPR, effect of thermal and furnace blacks on viscosity of (abs-S96#32) (4) 721
- Ethylene/alpha olefin/diene copolymers, made with catalysts having constrained geometry (abs-F95#8) (1) 139
- Ethylene/octene copolymers, with superior oxidative stability (abs-F95#10) (1) 139
- Eutectic mixtures, of curing agents and resulting variables (abs-S96#20) (4) 718
- EVA copolymer, electron beam grafting and crosslinking, characterizing structure (1) 120
- Exxpro isobutylene elastomers, with silica and black fillers, rheological behavior (abs-S96#41) (4) 724
- Exxpro, isobutylene-based elastomers, interaction with silica and carbon black fillers (abs-S96#40) (4) 724
- Failure, of IR, related to intrinsic defects (4) 591
- Fatty acids, effect on crystallization of *cis*-1,4-polyisoprene (4) 600
- Fatty acids, mixed and esterified, synergistic effect on low temperature crystallization of *cis*-1,4-polyisoprene (4) 608
- FIBC (Flexible Intermediate Bulk Container), recent changes and current status (abs-S96#21) (4) 719
- FIBC (Flexible Intermediate Bulk Containers), for returnable/reusable chemical packaging (abs-S96#17) (4) 718
- Filler distribution, in blends of BIMS/IR, quantitative characterization (abs-S96#12) (4) 716
- Fillers, for optimizing traction, abrasion, and rolling resistance of tire treads (abs-S96#4) (4) 714
- Fillers, for rubber reinforcement, chemical aspects (3) 325
- Fillers, nonblack, in tire compounds (rev) (3) 377
- Fine scale characterization, of crosslink density with atomic force microscope (5) 801
- Flaw size, and failure performance in GR, NR, and deproteinized NR (4) 591
- Flow, in intermeshing internal mixer, simulation and consideration of rotor design (4) 686
- Fluid extraction, supercritical, for determining total extractables of SBR (abs-S96#14) (4) 717
- Gas chromatography, capillary column inverse, for diffusion of BR rubber (2) 234
- Gas chromatography, inverse, for studying polymer properties (rev) (3) 347
- Gent constitutive model, of rubber elasticity, compared with Arruda-Boyce model (5) 781
- Glass transition temperature and molecular mobility, in ultrasonic devulcanization of SBR (1) 104
- Goodyear Medal Address, 1996 (3) 325
- GR latex, characterization and performance testing (2) 215
- GR, low-ammonia, properties compared with those of NR (2) 215
- Hazardous materials, handling in the rubber industry (abs-S96#19) (4) 718
- Hertz, Daniel L., Rubber Division Chairman, 1996, biog. (1) G2
- Hose, automotive EPDM, use of scrap in new hose (abs-F95#19) (1) 141
- HSBR, hydrogenated SBR, for improving transparency and flexibility of PP (abs-S96#39) (4) 724
- Infrared, far-, for studying distribution of crosslink types in polyisoprene vulcanizates (2) 173
- Injection molding, of rubber, model for determining effect of vulcanization on rheology (2) 294
- Injection molding, of rubber, rheology affected by vulcanization (2) 277
- INSITE® technology, for making copolymers of ethylene with 1-octene and other alpha olefins (abs-F95#10) (1) 139
